F13 – RUBRIC LEAN CANVAS MODEL EVALUATION

Assessment Criteria	Excellent (8-10)	Good (6-7)	Satisfactory (5)	Poor (1-4)
Problem	The key stakeholder's problem is vividly described	The key stakeholder's problem is well described	The key stakeholder's problem is not clearly described	The key stakeholder's problem is confusing/too vague
Solution	Clear description on how the solution features would address stakeholder's problem with very realistic connection of solution to problem	Brief description on how the solution features would address stakeholder's problem with some valid connection of solution to problem	Very brief description of solution features and unclear connection of solution to problem	Missing helpful description and unrealistic connection of solution features to problem
Key Metrics	Means of monitoring solution performance is very detailed and convincing as it includes all three elements of metrics (usability testing, competitor tracking and market performance monitoring)	Means of monitoring solution performance has good detail and it includes at least two of three elements of metrics (usability testing, competitor tracking and market performance monitoring)	Means of monitoring solution performance is Means of monitoring briefly described. The key solution performance is metrics is vaguely not valid/convincing described and does not appear convincing	ance is Means of monitoring The key solution performance is vaguely not valid/convincing oes not
Unique Value Proposition	Value proposition is highly relevant and specific (description how solution present benefit to stakeholders) as well as very convincing statement on why stakeholders would choose the solution over others	Value proposition is clear (description how solution present benefit to stakeholders) as well as some convincing statement on why stakeholders would choose the solution over others	Value proposition is somewhat relevant and brief (description how solution present benefit to stakeholders) with some statement on why stakeholders would choose the solution over others	Value proposition (description how solution present benefit to stakeholders) and statement on why stakeholders would choose the solution over others is vague and confusing
Unfair Advantage	Very detailed and persuasive statement on why solution would be worthwhile to invest in	A clear statement on why solution would be worthwhile to invest in	Brief and somewhat unclear statement on why solution would be worthwhile to invest in	Confusing and non- convincing statement on why solution would be worthwhile to invest in

EC Forms.indd 161 8/28/2015 4:23:59 PM

Channels	Very detailed and realistic channel of choice which is highly suitable to the stakeholders and means of delivering the solution	Very detailed and realistic clear channel of choice channel of choice which with some may not be is highly suitable to the stakeholders and means of delivering the solution of delivering the solution	Most channel of choice may not be suitable to the stakeholders and means of delivering the solution	Unrealistic channel of choice with most not being suitable to the stakeholders and means of delivering the solution
Customer Segments	Stakeholder segment is exceptionally clear with convincing listing on potential future segments (highly relevant to solution)	is Stakeholder segment is clear with potential future segments somewhat relevant to solution	Stakeholder segment is exceptionally clear with convincing listing on future segments optential future segments to highly relevant to solution) Stakeholder segment is Stakeholder seg	ont is Stakeholder segment is clear. vague/not realistic. ments Potential future segment is highly irrelevant
Cost Structure	Exceptionally clear and clear and son sensible structure on all structure operational converting the solution converting the solution production, on production, on production, customer retention, etc.)	Exceptionally clear and Clear and some sensible Some critical cost sensible structure on all structure on all structure is missing but operational costs in operational costs in appears somewhat in converting the solution converting the solution into a startup (i.e. costing into a startup (i.e. costing on production, on production, on production, marketing, testing, testing, customer retention, etc) customer retention, etc)	Exceptionally clear and Clear and some sensible structure on all structure on all structure on all structure on all structure is missing but structure is missing and operational costs in operational costs in operational costs in operational costs in operational converting the solution converting the solution into a startup (i.e. costing into a startup (i.e. cost	cost Many critical cost but structure is missing and in unrealistic plan in tion converting the solution ting into a startup (i.e. costing tion, on production, ting, marketing, testing, tc) customer retention, etc)
Revenue Streams	Exceptionally clear and sensible plan in gaining customer traction to purchase solution and in maintaining profit	Exceptionally clear and somewhat Somewh sensible plan in gaining sensible plan in gaining plan in gaining customer traction to customer traction to purchase solution and in purchase solution and in maintaining profit maintaining profit maintain	Exceptionally clear and Clear and somewhat Somewhat unconvincing Unrealistic sensible plan in gaining sensible plan in gaining plan in gaining customer traction to customer traction to customer traction to purchase solution and in purchase solution and in purchase solution and in maintaining profit maintaining profit maintaining profit maintaining	Unrealistic plan in gaining customer traction to purchase solution and in maintaining profit
